TREATCARD REWARDS

**Do you want to try new treatments for free?
Make sure you collect your Treatcard 'Fob'
from us on your next visit.**

Once you visit us you will receive your very own Sparkle With Beauty treatcard. This means each time you have a treatment, purchase a product with us, upload a salon selfie, refer a friend and rebook you will receive points.

Your points will then start to build up to give yourself a FREE treatment of something you have never had with us before. The points build up very quickly, and who doesn't love a freebie!

You can access your points and keep track by using our Sparkle With Beauty app, download for free now to book in the comfort of your own home.

OUR PHILOSOPHY

Sparkle With Beauty are a unique Spa and clinic, based in the heart of Hersham.

We are very humbled to have won 'Best Beauty Salon of the Year' in The English Hair and Beauty 2019 Awards

From the moment you arrive, we want you to feel special, valued and relaxed. We identify your specific needs, go out of our way to ensure that you leave the salon feeling rejuvenated, pampered and looking forward to your next appointment.

Dani and her team pride themselves on the extensive training they continuously take part in, ensuring the team are trained to the highest standards and delivering the best treatments possible.

We provide tailored advice, expert knowledge on all of our products and services – plus customised and after-care programmes you can continue at home. We constantly strive to offer new treatments and meet current trends whilst continuing to specialise in your fave classic treatments too.

If you have any questions we are always happy to help.

Dani and the Team

LYNTON LASER TREATMENTS

A woman in a dark blue uniform and sunglasses is performing a laser treatment on a client's face. She is holding a white Lynton EXCELIGHT IPL device with a flexible hose. The client is lying down, wearing a pink shirt and a grey blanket. The background is a wall with a dark, patterned wallpaper.

"Here at Sparkle With Beauty we only use the best equipment possible on our clients, ensuring we deliver safe treatments that provide outstanding results. We chose the Lynton EXCELIGHT IPL for a number of reasons, which include the quality of the result achievable but also because of the high level of training provided. All our Clinicians have received in-depth training from Lynton, all delivered in partnership with the world-leading institute of higher education - The University of Manchester."

DANI, OWNER
SPARKLE WITH BEAUTY

“We are proud to be Offering the UK’s Most Popular Advanced Cosmetic Treatments”

Here at Sparkle With Beauty we are so proud to have launched a range of new advanced cosmetic light-based treatments to help tackle most common aesthetic concerns. These new IPL (Intense Pulsed Light) treatments include highly effective permanent hair reduction as well as a variety of skin rejuvenation solutions, such as, acne, rosacea, pigmentation, sun damage and vascular outbreaks.

Partnering with the UK’s No.1 laser & IPL manufacturer and leading NHS supplier, Lynton, a selection of our staff have undertaken extensive theory and practical based training to help ensure all their clients receive the safest treatment possible, alongside unrivalled clinical results. Lynton have over 23 years’ experience manufacturing a broad range of aesthetic technologies and have won multiple awards for the quality, safety and clinical results achievable with their equipment.

Treatments available with the new Lynton EXCELIGHT IPL:

Hair Removal, Skin Rejuvenation, Anti-aging, Red Vein Removal, Acne, Sun Damage, Pigmentation, Rosacea, Illumi facial and more.

Our brand of choice, Lynton, is the leading manufacturing and supplier of aesthetic technologies to an extensive list of high profile clients around the world, including the NHS. A team of Ph.D. scientists design, develop and test all their products to ensure that their systems achieve the most effective, but safest results possible.

Consultation Procedure

Prior to treatment, a consultation is conducted in which a medical history is taken to confirm suitability for treatment. There is also an opportunity for any questions you may have to be answered. Before treatment commences you must provide written consent and a small test patch will be carried out.

LASER HAIR REMOVAL

We offer a safe, long-term solution to unwanted hair for both men and women.

This treatment is suitable for the face and body, is quick and results can be seen after just a few sessions.

How is the treatment carried out?

The applicator is placed on the skin and a short pulse of light is released, which targets many follicles simultaneously. The applicator is then moved to the neighbouring area of skin and the process is repeated until the area is treated.

How does light-assisted hair removal work?

Light is selectively absorbed by melanin, the pigment in the hair follicle. The light energy heats the pigment and effectively destroys the hair follicle without damaging the surrounding cells.

Am I suitable for this treatment?

Most people are suitable for treatment. Best results are often achieved with clients who have fair skin and dark hair. Dark hair is more easily treated as it has a high concentration of melanin. Fair hair, however, contains less melanin and is harder to treat. We recommend a consultation to ascertain if the treatment will be successful for you. Grey/white hair has no melanin so is not suitable.

How many treatments are necessary?

Only hair that is actively growing is affected, therefore multiple treatments are needed. Treatment is conducted every 4 - 8 weeks depending on the area treated, until a satisfactory result is seen. The required number of treatment varies but typically 6 or more are needed for optimum results.

How does the treatment feel?

Treatment sensation varies but is often described as “a flick of an elastic band”. Typically no anaesthesia is required and most clients describe the discomfort as moderate and tolerable.

What will I see after the treatment?

The hair follicles are damaged by heat but the hairs remain in the follicles. The dead hairs shed after 1 - 3 weeks as the epidermis renews. During this period the hairs will seem to ‘grow’ as they are pushed out by the new epidermis.

How long does each treatment take?

Treatments can take as little as 10 minutes up to an hour, depending on the size of the area being treated

Are there any side-effects?

The skin may be red immediately after treatment and the hair follicles may be swollen and bumpy but this usually subsides within a few hours. Unwanted reactions are rare but may include a small blister or temporary lightening or darkening of the skin.

Consultation Procedure

Prior to treatment, a consultation is conducted in which a medical history is taken to confirm suitability for treatment. This is also a good opportunity for you to ask any questions you may have. Before treatment commences you must provide written consent and a small test patch will be carried out.

Redeemable against treatment or course booked.....£40.00

	Full legs	90 mins	£385	£1925

SKIN REJUVENATION

Skin Rejuvenation treatments offer a solution for all the visible signs of ageing caused by sun damage, such as brown spots (pigmentation), redness (thread veins) and uneven skin texture, lines and wrinkles.

How does the treatment work?

Precisely controlled short pulses of light are released that target discolouration (brown and red lesions) to create a more youthful, even complexion. In addition, this light results in the stimulation of the fibroblast cells, leading to increased production of new collagen and elastin. This improves the texture of the skin, evening out lumps and bumps whilst reducing the appearance of lines and wrinkles.

How is the treatment carried out?

Upon consultation a treatment procedure will be tailored specifically to you. The process will include a light applicator that is placed onto the skin and a short pulse of light is released. The hand piece is then moved to the neighbouring area and the process is repeated until the entire area is treated. During treatment protective eye wear will be provided.

Am I suitable for treatment?

Yes, treatment is suitable for most people. We recommend a full consultation to ascertain your suitability and to allow the treatment to be tailored to your needs.

How does the treatment feel?

Treatment can be mildly uncomfortable, but no anaesthesia is required and most people describe the discomfort as moderate and acceptable, not unlike a quick pin prick and warm feeling.

Are there any side effects?

The skin may be quite red and slightly swollen after treatment, but this usually subsides quickly. Very rarely a small blister may form and there can be temporary lightening or darkening of the skin. However, most people experience no side effects and any skin reaction usually disappears within a few hours.

What should I expect after the treatment?

Redness and a slight warming sensation are normal after treatment. A cooling pack is applied after treatment to calm the skin. You may see a darkening of any pigmented spots before they flake off, leading to a more even skin tone. Tightening of the skin should increase over the following months as new collagen is produced within the dermis.

SKIN REJUVENATION PRICE LIST

How many treatments are necessary?

Treatments are carried out every 2 to 3 weeks and 6 treatments are recommended for best results. Thereafter, top-up sessions are performed as required, but typically once or twice a year.

How long does each treatment take?

Treatment times can vary but typically between 20-45 minutes depending on the area

Consultation Procedure

Prior to treatment you must first undergo a consultation where details about your medical history are obtained in order to confirm suitability. Before proceeding you will be asked to sign a consent form and undergo a test patch.

**Redeemable against treatment
or course booked.....£40.00**

TREATMENT	approx treatment time	cost per session	courses (6th treatment free)
Half face	30 mins	£135	£675
Full face	45 mins	£175	£875
Full face & neck	60 mins	£200	£1000
Full face & neck & chest	60 mins	£250	£1250
Neck only	30 mins	£125	£625
Chest only	45 mins	£150	£750
Hands	30 mins	£100	£500

RED VEIN REMOVAL

We can provide a long term solution to facial problems such as red flushing (Rosacea), thread veins and red spots in just a few quick and easy treatments

How does the treatment work?

Light energy is applied to the skin where it is readily absorbed by blood vessels, heating them to a point where they are destroyed. Following treatment, the vessels quickly clear as they are re-absorbed by the body, leaving little or no trace of the original lesion

What types of veins can be treated?

Most red skin lesions, including the facial thread veins, rosacea, spider naevi and port wine stains, can be treated very successfully. Depending on the lesions, leg vessels can also respond well to treatment.

How is the treatment carried out?

The light applicator is placed on the skin and a short pulse of light is released. The applicator is then moved to the neighbouring area and the process is repeated until the entire area is treated. During treatment, protective eyewear will be provided.

Am I suitable for this treatment?

Treatment is suitable for most people. Best results are obtained for those with fair skin, and there is less sign of side-effects.

How does the treatment feel?

Treatment is mildly uncomfortable but there is no need for anaesthesia and the procedure is actually quite quick. Sensations vary but most describe it as a very quick, hot pin prick.

Are there any side-effects?

After treatment the area may feel warm for a few hours. Rarely, some delicate skin areas such as the cheeks or decollate can be red and slightly swollen for up to 48hrs. Though very rare, there is a chance a small blister may form and there could be temporary lightening or darkening of the skin.

RED VEIN REMOVAL PRICE LIST

How long does each treatment take?

Treatments typically take from 15 to 45 minutes, depending on the type and size of the lesion.

How many treatments are necessary?

Typically 3 to 5 treatments are needed for optimum results, though small lesions may clear in just a single session. Repeat treatments are spaced every 4 to 6 weeks.

Consultation Procedure

Prior to treatment you must first undergo a consultation where details about your medical history are obtained in order to confirm suitability. Before proceeding you will be asked to sign a consent form and undergo a patch test.

Redeemable against treatment or course booked.....£40.00

TREATMENT	approx. time	single treatment	course (3 sessions with a 15% discount)
Single lesion	30 mins	£75	£195
Cheeks	30 mins	£100	£255
Cheeks and nose	45 mins	£150	£380
Half face	45 mins	£180	£460
Full Face	60 mins	£200	£510
Full face & neck	75 mins	£250	£640
Full face, neck & chest	90 mins	£300	£765
Chest only	45 mins	£180	£460
Hands	30 mins	£150	£380

PIGMENTATION REMOVAL

Pigmented lesions such as sun spots and freckles can be successfully removed creating a more flawless, youthful and glowing appearance

How does the treatment work?

Light is released in short pulses that are readily absorbed by the high melanin found within pigmented lesions. The rapid absorption of light energy heats the melanin and causes the destruction of melanin-rich cells.

How is the treatment carried out?

The light applicator is placed on the skin and a short pulse of light is released. The applicator is then moved to the neighbouring area and the process is repeated until the entire area is treated. With Q-Switched Laser treatments due to the power of the Laser energy delivered into the skin, a small amount of pinpoint bleeding may occur during the treatment and a dressing may be applied afterwards to protect the skin while it heals. During treatment, protective eyewear will be provided.

Am I suitable for this treatment?

Most people are suitable for treatment except for very dark skinned or tanned individuals. However, large, dark, mottled or raised pigmentation cannot be treated and may need to be checked by a dermatologist. Large, dark moles should not be treated, nor should lesions covering a large part of the body. The pigmented marks that respond the best are superficial lesions such as those caused by sun damage (sun spots) and freckles

How many treatments are necessary?

The number of treatments will depend on the type and size of the pigmented lesion but typically 1 to 3 sessions are required at 4 to 6 week intervals.

How does the treatment feel?

Most patients describe the discomfort as mild and tolerable

What should I expect after the treatment?

The treated area may feel warm and sensitive for the first few days post treatment. The lesions may darken and may appear more obvious before they 'flake' away. Sometimes an initial whitening of the area is seen which quickly fades and the pigmentation gradually fades over the following weeks.

PIGMENTATION PRICE LIST

Are there any side-effects?

The skin that surrounds the pigmented lesion may become red immediately after treatment. Most people experience no other side effects and the redness usually disappears within areas within a few hours to a few days. Very rarely a small blister may form or the skin may become temporarily lighter or darker.

How long does each treatment take?

The length of each treatment will depend on the type and size of the lesion present, but a typical session will take 10 to 30 minutes

Consultation Procedure

Prior to treatment you must first undergo a consultation where details about your medical history are obtained in order to confirm suitability. Before proceeding you will be asked to sign a consent form and undergo a patch test.

**Redeemable against treatment
or course booked.....£40.00**

TREATMENT	approx. time	single treatment	course (3 sessions with a 15% discount)
Single lesion	30 mins	£75	£195
Cheeks	30 mins	£100	£255
Cheeks and nose	45 mins	£150	£380
Half face	45 mins	£180	£460
Full Face	60 mins	£200	£510
Full face & neck	75 mins	£250	£640
Full face, neck & chest	90 mins	£300	£765
Chest only	45 mins	£180	£460
Hands	30 mins	£150	£380

ACNE TREATMENT

Acne can be effectively treated with Intense Pulsed Light alone or in combination with other clinical treatments. Intense Pulsed Light treatments greatly reduce the number and severity of active lesions, lessening the inflammation and frequency of break-outs

How does the Intense Pulsed Light work?

The light emitted from the Intense Pulsed Light system directly targets overactive sebaceous glands, greatly reducing the number and severity of active lesions, and lessening the inflammation and occurrence of break-outs. The light stimulates the production of new collagen to improve skin texture and can also reduce the appearance of red or brown areas of skin that are often associated with acne breakouts.

How is the treatment carried out?

A layer of chilled gel is applied to the skin to help guide the light. The light guide is placed onto the skin and a short pulse of light is released. The applicator is passed over the skin several times before moving onto the neighbouring area and the process is repeated until the whole area is treated. Each pulse of light treats a large area of skin and so the duration of the treatment is very short. The gel is removed and the skin is moisturised. During treatment, protective eyewear will be provided.

Am I suitable for this treatment?

Almost everyone can be treated, apart from very dark skinned or tanned individuals. If you are pregnant or taking Roaccutane (acne medication) it is best not to undergo laser or Intense Pulsed Light treatment.

How does the treatment feel?

Treatment is mildly uncomfortable but there is no need for anaesthesia and the procedure is actually quite quick. Most people describe the sensation as similar to the flick of an elastic band.

ACNE TREATMENT PRICE LIST

What should I expect after the treatment?

Immediately after treatment the skin may appear red and a warm tingling sensation may be felt. Typically the skin is cooled to ease discomfort and a calming gel is applied.

Are there any side-effects?

The treated area can become quite red immediately after treatment but this usually disappears within a couple of hours. Most people experience no other side-effects but very rarely a small blister could form or the skin may become temporarily lighter or darker.

How long does each treatment take?

Treatments typically take approximately 30 minutes.

How many treatments are necessary?

The number of treatments varies from person to person but typically 6 Intense Pulsed Light and 6 exfoliating treatments will result in a significant improvement.

Consultation Procedure

Prior to treatment you must first undergo a consultation where details about your medical history are obtained in order to confirm suitability. Before proceeding you will be asked to sign a consent form and undergo a patch test.

Redeemable against treatment or course booked.....£40.00

illumiFacial®

ILLUMI FACIAL

The Ultimate Photo-Facial

This quick and simple facial treatment dramatically improves skin tone and appearance, helping your skin feel and look its best.

The illumi Facial is the 'next generation' of highly successful 'Photofacial' treatments which combine Lynton's specialist skincare serums together with their medical-grade IPL technology.

OUR
CLIENTS
LOVE

WHY CHOOSE AN ILLUMI FACIAL?

Skin Tone

IMPROVES SKIN TONE

This amazing facial combines a unique Acid Peel and IPL treatment in one. This process assists with the removal of impurities and pigment spots, leaving a more even skin tone.

Collagen

IMPROVES COLLAGEN PRODUCTION

This combined IPL treatment stimulates collagen production deep within the skin tissue. This effect will continue to provide further enhancements long after your initial treatment.

Reduce Acne

REDUCES ACNE AND BLEMISHES

This is a perfect treatment for congested skin. The Tri-Fruit Acid Peel unclogs and decongests your skin's pores to lessen future acne breakouts.

Hydrate

HYDRATES AND FRESHENS

Hydrates and freshens by removing impurities with your skin. Our specialist trio of serums restore your skin's natural Ph balance, leading to a fresher more hydrated appearance.

Tightening

TIGHTENING

The illumi IPL facial combines Lynton's fruit acid peel and advanced serums to lift, tighten and reduce the appearance of fine lines and wrinkles.

Soft & Smooth

SOFTENS AND SMOOTHS

The Illumi Facial is perfect if you're looking for that flawless look. This combined treatment smooths and reduces blemishes, light scarring and other discoloration.

Am I suitable for Illumi Facial?

Treatment is perfect for anyone whose skin exhibits congestion, discolouration and visible signs of ageing, however, a full consultation is carried out prior to treatment to ascertain your suitability and individual treatment needs. A full treatment plan will then be tailored to treat your specific concerns, all aiming to improve the appearance, feel and health of your skin.

What should I expect after Illumi Facial?

You may experience a superficial tingling feeling on the skin and you may see a darkening of pigment spots before they flake away - this means the treatment has worked perfectly in providing you with a more even, flawless skin tone. As well as clearer, healthier skin, you will also experience an ongoing improvement to the firmness and plumpness of your skin in the following months post-treatment, as new collagen is stimulated deep within the skin tissue.

How does the treatment feel?

Illumi Facial is a very quick, comfortable treatment which is designed to provide you with 'optimum skin health'. Some people will feel a slight tingling sensation when the fruit peel is first applied, but it very quickly subsides. The IPL aspect of this treatment can sometimes be mildly uncomfortable - most people describe the discomfort as feeling like a 'quick pinprick' and 'warm feeling', which is very tolerable.

Are there any side effects?

The Illumi Facial is a completely non-invasive treatment, using safe, medical-grade equipment to minimise side effects. Your skin may be red and slightly swollen immediately after treatment, but this will subside very quickly. You may also have some patches of dry skin and in very rare cases, a small blister can form with some temporary lightening or darkening of the skin. However, most people experience absolutely no side effects and any reactions usually disappear within a few hours, leaving the skin feeling and looking radiant.

Consultation Procedure

Prior to treatment you must first undergo a consultation where details about your medical history are obtained in order to confirm suitability. Before proceeding you will be asked to sign a consent form and undergo a patch test.

Redeemable against treatment or course booked.....£40.00

CALL US TO BOOK YOUR APPOINTMENT 01932 988 765

Single session.....	£199.00
Course of 3 (15% discount).....	£537.30

THE FOUR STEPS OF YOUR ILLUMI-FACIAL

1. Cleanse

The first step in achieving clear, healthy, radiant skin will involve a deep cleanse, with your Illumi Facial® practitioner using a specialist formulation to remove any impurities.

2. Tri-Fruit Acid Peel

Following a deep cleanse, a unique Tri-Fruit Acid Lynton Fruit Peel will be applied to your skin, for anywhere between 3 -10 minutes. This peel resurfaces skin texture and decongests pores, priming the skin ready for stage 3 of Illumi Facial®.

3. Lynton IPL

Post fruit peel, your skin will be at its optimum condition for the application of the award-winning Lynton Intense Pulsed Light (IPL) treatment. This works by both stimulating collagen and targeting any discolouration on your skin, e.g. freckles, pigmentation, vascular breakouts, general redness. In most cases, the results are instant, providing you with dramatically clearer, firmer skin.

4. Hydrate & Protect

To help maximise the results of your Illumi Facial treatment, a trio of specialist serums will be applied to your skin post-IPL, helping soothe, regenerate and protect your skin.

PERMANENT MAKEUP

Make time for yourself with permanent make up and get the look you want for longer. Permanent make up can enhance your brows eyes and lips and the results last, meaning you save on your daily beauty routine. You can look your best morning, noon and night. It is the most positive, life changing beauty treatment you can have. Look and feel great without spending hours in a mirror. Subtle to defined, understated to glamorous, there are lots of different treatment options.

Results can last years (although you will need to keep your colour topped up). Dani, the salon owner is a fully insured and fully qualified elite permanent make-up artist. She is very confident in what she does and is very much a perfectionist in her work, she will not offer any treatments until she is 100% happy that the client is comfortable and confident in her work. This is what makes Dani the very best at what she does.

What makes us different from the rest?

Dani has undergone years of training to get where she is today and trained within the best permanent make-up company in the country. People travel from all over the world to train within this company. After your initial procedure you will require a “top up” no earlier than 4-6 weeks later to make sure your permanent make up has healed under your skin. The top up is to perfect the initial shape and colour of the permanent make up. After this has been perfected your permanent make up should last between 6-18months. This differs from person to person.

Consultation

The first part of the process is a consultation. This is normally done as part of your initial treatment, but can be done separately if you prefer. Dani will talk with you in great detail about the look you are trying to achieve and what we might recommend to you. This is very much a two-way conversation. We listen, we respond, we advise. Once we have an idea of the look you are aiming for, we draw the brows on with a makeup pencil. These can be drawn on and adjusted 50 times if necessary! We will never begin the tattoo process until you are completely happy with what they are going to look like.

Treatment

Using a specialist facial tattooing machine, which works at a much lower frequency than a standard tattoo machine, we gently apply pigment to the skin using very fine needles. The sensation is that of an electric toothbrush being held against your skin – you feel the vibrations but you should not feel any discomfort. We will always work with you at this stage, giving you breaks if you need them. The process normally takes about 1-2 hours, but it varies from person to person depending on your individual requirements. Immediately after a brow treatment you should expect the area to look 20-30% darker than the colour you have chosen in consultation. This will start to fade after 3-7 days.

The Retouch

A second appointment is needed 4-12 weeks after your first treatment (included in initial price) This is usually a 15-60 minute appointment to add more pigment to the brow area. This is because as the area is healing, some parts may not ‘hold’ as well as others and you may have a few patches that need more colour. This is completely normal and everyone heals differently. Whatever the case, we advise you always come back to clinic for your retouch.

PERMANENT MAKE UP - EYES PRICE LIST

Save time applying eye makeup, a pro artist can imitate various styles of eye make-up, plus apply it with greater accuracy. Add extra definition to your eyes with a natural look. Lash enhancements are perfect for adding extra definition to your eyes. Want something more dramatic? Improve the shape contour or overall balance of your eye. Advanced artists can use techniques similar to those of pro make-up artists to improve the overall appearance of your eyes.

Lash enhancement

A fantastic treatment if you simply want to add extra definition to your eyes, without an eyeliner look. You might be surprised but this is one of the most popularly requested eye treatments in permanent cosmetics

.....£350.00

Baby eyeliner

Save valuable time applying eyeliner every morning and eliminate the worry over smudging. There are various styles and results you can have including basic, pencil, liquid, soft shaded, two toned and other styles. With an experienced elite artist, the sky is the limit. Discuss the look you want and the artist will develop a personalised solution for you.

.....£400.00

PERMANENT MAKE UP - BROWS PRICE LIST

Hair stroke brows

This is one of the most requested brow treatments and involves tattooing imitation hair strokes to imitate natural brow hairs. It is one of the most popular treatment requests in permanent cosmetics

Combo brows

If you want a more defined look with deeper colours, then you might opt for power (city) brows. This combines hair strokes with intense colour techniques to produce a more powerful brow style. This treatment requires experience and skill to perform.

(including retouch).....£400.00

Colour boost

A colour boost is necessary as your permanent makeup fades. Colour boost procedures are advised 6-18months after your initial treatment. This ensures the enhancement keeps its optimum quality. SPF30 is recommended to prevent the enhancement from fading in the sun.

Hair stroke brows colour boost.....	£175.00
Combo brows colour boost.....	£200.00
Lash enhancement colour boost.....	£175.00
Baby eyeliner colour boost.....	£200.00
